

CDCS Opening Symposium 2022

You are invited to join us at our [CDCS opening symposium](#) on *Data Science for cross-disciplinary research*! Liaise with computational scientists in the fields of physics, biology and engineering. Join the discussion on computational methods in multidisciplinary fields and seize the opportunities for new collaborations.

Date: 26-28 April 2022

Venue: [CSSB](#), DESY Campus, Hamburg (on-site)
cdcs-symposium.desy.de

Submit your abstract for our poster session!
Fee waiver and poster prize available!

Deadline 22nd March!

Opening keynote: Sofia Vallecorsa, an expert in Machine Learning and Quantum Computing at CERN openlab

Cross-disciplinary keynote speakers:

- Kai Polsterer, Computational Astro and Particle Physics
- Filipe Maia, Computational Photon Science
- Kimberly Glass, Computational Systems Biology
- Louise Travé-Massuyès, Computational Controls of Accelerators
- Katja Hose, Computational Core Unit

The registration fee includes a [gala dinner on a boat](#) on the Elbe river and the option to participate in [DESY tours](#). Fee waiver and travel grants are available, see details [here](#).
